

PTH WORKBENCHES

FIXED HEIGHT / HEIGHT ADJUSTMENT WITH LOCKING SCREWS

CHARACTERISTICS OF THE METAL FRAMEWORK

PTH fixed-height frame

The frame consists of a structure of tubular steel thickness 20/10 and formed sheet steel thickness 25/10.

The legs are made from 40 x 40 section welded tube, the horizontal cross-members formed into a U section

40 x 60 x 40 mm. The 3 cross-members join the ladders: two at the top under the workbench-top, one at the bottom.

The framework is finished in epoxy powder paint polymerized in a kiln at 180°C.

The design is such that the assembly of the different metal components shows no external screws or bolts, thus providing the user with better protection against injury.

The tubes of the legs are finished with plastic tips to prevent damage to flooring. They can be equipped with adjusting cylinders or castors on option.

PTH frame with locking screws height adjustment

The PTH workbench with sliding adjustment enables adjustment of the working height. The adjustment range extends from 740 to 1020 mm for the frame, excluding the thickness of the workbench top.

Holes drilled 20 mm apart facilitate height adjustment and provide points of reference.

The sliding adjustment system is easy to use with 4 screws and no need for dismantling.

Matching framework to top

The frame of the SI workbench can be fitted with a workbench top in 40 or 24 mm beech multiplex, 40 or 30 mm high heat-resistance laminated, 30 mm ESD laminated, 38 or 28 mm melamine, 40 mm MDF with HPL coat, 40 mm anti-shock Taralay or 45 mm multiplex (40 mm) with PE cover (5 mm).

The workbench top is fixed to the frame with TH 5x20 cross-head sleeper screws and can be positioned flush or centred depending the user's needs.

Dimensions of the workstations

- Length: 750 (W.750 only), 1000, 1200, 1500, 1800, 2000 and 2400 mm
- Width: 750 and 1000 mm

Assembly

- Quick and easy assembly
- Workbench supplied in kit form
- Assembly available on request

LABELS

The PTH fixed-height workbench bears GS label, the NF Environnement (environment) and NF Mobilier technique (technical furniture) quality labels. Workbenches tops bear the PEFC label. The certified maximum permissible load for the PTH fixed height workbench is 500 kg. In compliance with standard XPD 65762.
